2018 Environmental Objectives

Listed below are Brooks 2018 Environmental Objectives.

- Continue to monitor both our electrical energy consumption measured in kilowatt hours and our natural gas consumption measured in centum cubic feet.
- Maintain the implementation of energy savings strategies that reduce both air condition and lighting requirements when employees are both present and not present. These strategies pertain to normal working hours and non-working hours.
- Maintain and improve our recycling program through our general waste stream.
 - In 2017 our total amount of recycled materials was 20%
 - We hope to achieve 2% increase in recycling in 2018
- Continue to monitor water consumption and plant effluent. Data is used to evaluate need and feasibility of future environmental activities.

Brooks Automation, Inc. did not incur any environmental fines or penalties during 2017.

Bob Knudsen

A handwritten signature in black ink that reads 'Bob Knudsen'.

Brooks Automation, Inc.

Corporate Environmental, Health, Safety and Security Manager
