

Brooks Certified Used Equipment

OEM Quality Equipment , When You Need It, At Exceptional Value

SERVICES STATEMENT

Semiconductor fabs today operate in a fast-changing environment. Whether the challenge is to ramp a new process or to improve output on trailing-edge technologies while reducing operational costs, Brooks Semiconductor Services help chip makers around the globe meet their productivity goals and go to market faster.

Experts, processes, service analytics technology, supply chain solutions and flawless operations are combined in a flexible service portfolio to address all modern challenges of the semiconductor equipment automation and cryogenic components.

Brooks Semiconductor Services offer mission-critical depot repair solutions, on-site troubleshooting and repair, equipment auditing and consulting, training and certification, relocation services, parts consignment solutions and productivity enhancing upgrades on Brooks Automation products..

Unreliable Equipment Puts Your Operations At Risk!

Mature Semiconductor Fabs, Research Institutes and other similar process technology entities often face the challenge of finding used Brooks equipment for their tool maintenance inventory or for emergency tool down situations that is both reliable and affordable within their budgets. Often that pursuit leads these entities to purchase used equipment from unreliable third parties or internet resellers that are not experienced to ensure the equipment is right for the application and not qualified to ensure that the equipment is functioning to specification. Sometimes this results in the purchasing entity encountering longer down-times and higher costs when the risky used equipment is not a match for the application, does not function correctly, or fails soon after purchase. When this happens, those entities often call Brooks to help remedy the situation. At Brooks, we are always happy to help our valued customers, but there is a better way.

Call Brooks First For Quality Used Equipment

Brooks understands your need for quality used Brooks equipment. We understand your challenge to keep your fab or process operation up and running, and we understand the urgency to quickly recover when a tool down situation is encountered. We also understand your budget pressures, and the need to find the best value used equipment available to ensure your operations success. We get it that you need the right equipment, with high quality, on-time, every time. This is why we are pleased to offer Brooks Certified Used Equipment to meet your responsiveness, quality and budget needs.

Trust The Brooks Team For Quality Used Equipment

Brooks Certified Used Equipment: OEM Quality Equipment , When You Need It, At Exceptional Value

Why Brooks Certified Used Equipment?

We Know the Product!

Chances are we designed the equipment for the tool applications you are operating. We know the correct mechanical configuration you require for your application and we know the correct firmware versions you require. You can trust that you will receive the right used equipment when you buy from Brooks.

We Know How to Deliver Quality Equipment!

We manufactured the original product, and we have a team of manufacturing and quality engineers dedicated to ensuring that our Certified Used Equipment enjoys the same level of operations excellence that is applied to our new products. This team ensures consistent discipline in manufacturing processes, original OEM parts, technician training, test specification, and shipping packaging to ensure that Brooks Certified Used Equipment customers receive a high-quality like-new product.

We Are There For You!

Brooks has been supporting customers in semiconductor and related industries for decades with an extensive global team of Customer Support Engineers (CSEs) backed by a team of technical experts. If there is an issue with a product we delivered, we will resolve it quickly. We also offer extended warranties on Brooks Certified Used Equipment to give you extra peace of mind.

Brooks Offers Certified Used Equipment For These Product Lines

These items are frequently available as Brooks Certified Used Equipment:

- **Vacuum Robots** – Magnatran7, Magnatran8, VAC 407, MTR5
- **Atmospheric Robots** – Reliance, Razor, Equipe (AXM, DBM), Wafer Engine, Acutran, Aquatran
- **Cryopumps** – On-Board IS,[®] On-Board,[®] Cryotorr[®]
- **Compressors** – On-Board IS-1000, On-Board IS 2000V, 9700, 9600, 8200
- **Other** – If you do not see the product you need on this list, please ask Brooks Sales

How To Confirm Availability and Place An Order

- Availability of these items varies with supply and demand
- Consider purchasing in advance as a spare in preparation for your next tool-down situation
- Check list of available items at www.brooks.com/services/semiconductor/used-equipment
- The online list of Brooks Certified Equipment is updated periodically as supply changes
- Contact your Brooks sales representative to verify availability, confirm pricing, and place an order
- Our goal is to confirm availability and/or quote all Certified Used Equipment inquiries within 24 hours

For more information, please contact your local Brooks Automation sales representative or visit www.brooks.com to find a sales and service location near you.
