离开祖国之前要做这些事情!

Do These Things Before Leaving Your Home Country!

Using Your Mobile Phone and Accessing Online Services

Ensure that your phone carrier provides data roaming; some carriers may provide free roaming with no setup required.
Most Western websites, social media services, and messaging apps are blocked in China (Microsoft Teams and Apple iMessage are notable exceptions).

- Google services are blocked; however, **Bing** is accessible.
- Some language translator apps may also be unavailable.
- Apple Maps** is recommended for navigation, and it supports all businesses, public transportation, and ride-hailing.

If you need access to these resources during your time in China, please plan ahead by setting up a **VPN** on your phone. Do some research online and pick one of the few that work well in China. The Brooks Suzhou guest wifi is on a VPN and has access to some social media and messaging apps.

Payment with Digital Wallet Apps

In China, digital wallet apps are the norm and are supported at 100% of Chinese businesses: from restaurants to taxis to street vendors. We recommend you download one of these two popular options.

- Download the **Alipay** digital wallet app and connect it to your credit card.
- Alternatively, you can download the **WeChat** app, which has a digital wallet feature. WeChat supports foreign credit cards but is not as easy to set up with foreign banks.

Cash is generally accepted but seldom used.

Ride-Hailing for Car Transportation

For ride-hailing service for transportation by car, download the **DiDi** app. It will automatically handle text translation with your driver. This app supports both traditional taxis and DiDi drivers. There exists an Uber app for China, but it does not support English and is not commonly used.

使用手机和访问在线服务

确保您的电话运营商提供数据漫游; 一些运营商可能会提供免费漫游, 无需设置。
大多数西方网站、社交媒体服务和消息应用程序在中国被屏蔽 (Microsoft Teams 和 Apple iMessage 是明显的例外)。

- 谷歌服务被屏蔽; 但是, **Bing** 是可以访问的。
- 某些语言翻译应用程序也可能不可用。
- 建议使用 **Apple Maps** 进行导航, 它支持所有企业、公共交通和叫车服务。

如果您在中国期间需要访问这些资源, 请提前计划, 在手机上设置 VPN。在网上做一些研究, 然后选择在中国运作良好的少数几个之一。苏州布鲁克斯酒店的宾客 WiFi 使用 VPN, 可以访问一些社交媒体和消息应用程序。

使用数字钱包应用程序付款

在中国, 数字钱包应用程序已成为常态, 并且得到 100% 的中国企业的支持: 从餐馆到出租车再到街头小贩。我们建议您下载这两个流行选项之一。

- 下载支付宝数字钱包应用程序并将其连接到您的信用卡。
- 或者, 您可以下载微信应用程序, 它具有数字钱包功能。微信支持外国信用卡, 但在外国银行设立并不那么容易。

现金通常被接受, 但很少使用。

汽车交通网约车

对于汽车交通的叫车服务, 请下载 **DiDi** 应用程序。 它将自动与您的驱动程序一起处理文本翻译。该应用程序同时支持传统出租车和 DiDi 司机。中国有一个 Uber 应用程序, 但不支持英文, 不常用。
